Date of Hire

2006-2018

Overall, the company has 311 employees in which 104 were terminated, while, 207 are active employees. We could also observe that the company had a surge of employees during the year of 2011, then it continued to decline after 2014. We could also see that the top position as of date is Production Technician I and the top performing manager is David Stanley. Another observation is that despite an increase in hire, there was also an increase of termination of employees beginning in 2012 which then spiked in 2015. Primary reason of termination is that employees found another position. Absences of employees may also be a factor to termination as it is observed that the average absences of employees is 10.2
